

[Learn How Your Organization Can Partner With Us By Supporting Educational Curriculums For Advanced CKD Patient Education, Course Materials, Learning Guides, Workshops & Motivational Videos.](#)

OUR MISSION

The TransplantFirst Academy's mission is to offer nephrologists and renal group practices an accelerated Chronic Kidney Disease (CKD) patient education program that utilizes a proactive model of patient self-advocacy with emphasis on end-stage renal disease (ESRD) options and associated outcomes.

OUR PURPOSE

The TransplantFirst Academy's purpose is to improve CKD/ESRD patient outcomes by helping healthcare providers understand the critical call (and unmet need) for providing a comprehensive and progressively-tiered kidney patient education system—and their leadership role in promoting proactive patient self-advocacy.

OUR VISION

The TransplantFirst Academy's vision is to have all transplant eligible CKD patients optimize newly acquired knowledge and skills to circumvent dialysis, secure a preemptive 'live-donor' kidney transplant—and achieve a better quality-of-life.

WHO WE SERVE

The TransplantFirst Academy's target audience includes nephrologists, renal groups and transplant centers – and ESRD Networks and CMS divisions that provide and oversee CKD and ESRD patient education.
